ELK

TRINCIAERBA REVERSIBILE PER TRATTORI DA 35 A 75 CV REVERSIBLE FLAIL MOWER FOR TRACTORS FROM 35 TO 75 HP

The ELK flail mower / shredder is suitable for application to tractors from 35 to 75 HP and with category 1, 3-point hitch. Being a reversible machine, it can be applied both front and rear on different types of tractors: the gearbox is in fact supplied with two outlets, precisely to facilitate the combination. Solid flail mower ideal in the presence of tall grass on large areas, public parks, wooded areas (fire prevention action), motorway embankments, ski slopes and sometimes in agriculture, it has a double third point arch that can be, depending on the work needs, fixed or hydraulically movable (optional) of 25 cm. Also valid on shoots from 1 to 3 cm in diameter, the ELK is the perfect machine where high work productivity is required. Produced in the Peruzzo factories, it is available in the 1600 – 1800 – 2000 versions.

Moltiplicatore reversibile. *Reversible gearbox.*

ACCESSORI ACCESSORIES

Accessorio ruote. Accessory wheels.

LAME STANDARD STANDARD BLADES

Coltello "Y" per taglio mulching sp. 5 mm. Flail "Y" for mulching cut with 5 mm thickness.

Mazza in acciaio forgiato e temperata. Forged steel and hardened hammer.

Mazzetta a paletta robusta di spessore 5 mm per erba alta e piccoli arbusti. Heavy duty cast flail with 5 mm thickness for high grass and small branches.

LAME ACCESSORIE ON REQUEST BLADES

Coltello per verticut 125 mm da 3 mm di spessore.

Verticut 125 mm flail with 3 mm thickness.

Coltello a paletta di 3 mm di spessore per taglio uniforme su manto erboso. Paddle flail with 3 mm thickness for a fine and even cut on grass fields only.

Coltello "Y" per taglio mulching (spessore 5 mm) in abbinata a lama verticut da 125 mm di lunghezza e 3 mm di spessore.

Flail "Y" for mulching (5 mm thickness) in combination with verticut blade - 125 mm lenght and 3 mm thickness.
